

## ROLLER END CAPS

For conveyor belts transporting boxes and bags among others.

- Longer roller insert for improved tube grip.
- Made with durable high density polypropylene.
- With extra stainless steel interior ball for increased load capacity.
- Ease the roller's movement with less noise (15 interior balls of 4 mm each).
- 6 internal support points.
- Each roller end cap can support up to 30 lbs of load capacity.
- For 2" diameter rollers (can be manufactured upon customer's request).
- Roller end cap body can be made with PVC (white or grey) or steel (galvanized or stainless steel).
